

88mm x 7.5m roll or 140mm x 7.5m roll

PREMIUM ENERGY SILL SEALER is an air and moisture barrier for under doors and windows.

**STOP HEAT LOSS,
DRAUGHTS AND
MOISTURE**

Air & Moisture Barrier

Forms a waterproof gasket which conforms to any irregularities under bottom plates, doors and windows.

Benefits of Premium Energy Sill Sealer

- **Premium Energy Sill Sealer** consists of an SBS modified asphalt adhesive base with a 6mm thick closed cell foam top which conforms to irregularities in the substrate to seal under bottom plates, doors and windows.
- **Premium Energy Sill Sealer** can be used in conjunction with Protecto Wrap Sill System.
- **Premium Energy Sill Sealer** adheres to most substrates, however to enhance adhesion use Protecto Tak Primer or 100 Primer.
- **Premium Energy Sill Sealer** is not UV stable and should be covered within 90 days of installation.
- Made from non-absorbent closed cell foam.
- Mildew and water resistant.
